

# KITTEN NEEDS A FOREVER HOME !

"Cheese" was found as a 4-5 week old kitten near a staff member's home a few weeks ago and has since been cozying up to the Doctors and staff of Foothill Animal Hospital. It has been a joy watching him come out of his shell! In fact he shows no real fear of anything anymore. Although "Cheese" has been extremely "helpful" lately, greeting clients in the lobby and prepping charts with our receptionists, we know he'd have a better life in a private home. Please let us know if you would like to open up your heart and home to the very cute and silly "Cheese". Please contact Foothill Animal Hospital with any further questions. You can also see a video of "Cheese" on our Facebook page.

Sex: Male (intact)

DOB: 7/2011 +/-

Temperament: Very silly and talkative

Vaccines/De-worming: Current for his age

FeLV/FIV Test: Negative

Adoption Fee: For an established client of either Foothill Animal Hospital or The Animal Clinic of Tustin Ranch, there is no adoption fee. We simply ask that you allow us to continue providing "Cheese's" medical care. For a non-established client, a small adoption fee will apply (unless "Cheese's" medical care is to be continued through the aforementioned hospitals). Please be prepared to provide references, see reception for details.
